

The *Stat* - **X** First Responder®
is truly a new innovation in
fire suppression technology.
There is no other like it on
the market today. It will not
replace anything you are
currently using, but it could
be a wonderful addition to
your arsenal of tools.

WHAT IS Stat - X ?

The Stat - X compound is the most effective fire extinguishing agent currently available – many times more effective than conventional agents by mass. The Stat - X First Responder contains the same compound used in our ULC listed fixed fire extinguishing units. However, due to the tremendous variability of conditions in a firefighting situation, the purpose of the Stat - X First Responder is, first and foremost, for use as an extremely effective tool to suppress and limit the growth of fires until other traditional methods are available to put out the fire - any extinguishment is a bonus.

The Stat-X First Responder®

The Stat - X First Responder® is a new and innovative tool designed to aid in the suppression of fires and for use as a personal protection device for fire fighters in emergency egress or entrance situations. It is physically and functionally similar to a smoke grenade with the major difference that it delivers a highly effective aerosol fire suppression agent called Stat - X.

When would I typically use it?

Scenario A - Firefighter arrives at the scene of an early stage fire. After assisting in getting people out and before additional resources arrive at the scene, toss Stat - X First Responders into the rooms which are involved with the fire. This will buy time for further rescue and for the firefighters to lay hose.

Scenario B - Firefighters are concerned about potential flashover from a fire down a hall and water isn't yet available. Toss Stat - X First Responders ahead of the firefighters to eliminate many of the contributing factors of a flashover.

Scenario C - A firefighter is trapped or can't get to a victim due to an intense area of fire. Toss a Stat - X First Responder into the flame area for immediate fire suppression.

APPLICATIONS:

- High Rise Building Fires
- Confined Space Fires
- Below Grade Fires
- Electrical Vaults
- Shipboard Fires
- Bilge Fires (Activates & deploys under Water)
- Vehicle Fires
- Attic Fires
- Shipping Containers
- Before Hoses are in Place
- Rapid Entry Teams
- Rapid Temperature Drop
